SUMMARY

I completed my Computer Science and Engineering degree at Daffodil International University. Out of personal interest, I gained a technical foundation in software development, Cyber operations, and information security. Experienced in academic and personal projects involving Python, Django, REST APIs, and database technologies, with additional knowledge of Linux and Windows administration, configuring NAS personal servers, networking, and vulnerability assessment. I comes with technical problems methodically, communicate clearly, and work well with others believe my superiors and assistants have something valuable to teach me, and I remain open to learning from their experience. I bring practical skills and experience that I have continued to develop, supported by an NSDA Level 4 National Skills Certificate in Network and System Security and additional training from Cisco, LinkedIn and the ICT Division of Bangladesh. I believe that, with the right support and opportunity from your company, I can make a valuable contribution to the team.

EDUCATION

09/2022 - 07/2026
Computer Science and Engineering
Daffodil International University
Bachelor of Science (BSc)
CGPA 2.84 out of 4.00

07/2018 - 04/2020
Science
Bangladesh Air Force Shaheen College, Kurmitola
Higher Secondary Certificate (HSC)
GPA 5.00 out of 5.00

05/2014 - 01/2018
Science
Bangladesh Tea Research Institute High School
Secondary School Certificate (SSC)
GPA 5.00 out of 5.00

CERTIFICATES

Cyber Security V1
ICT Division, Government of Bangladesh
Successfully completed the Cyber Security V1 online course under the DIKKHA (Digital Interactive Knack for Knowledgeable Human Assets) Project, ICT Division, Government of Bangladesh.

Network and System Security
National Skills Development Authority (NSDA), Bangladesh
Completed 11 competency units covering IT operations, internet and office applications, OS administration, information security, malware analysis, vulnerability assessment, security systems bypass, IT ethics, workplace communication and OSH practices.

Cybersecurity & Network Defence
Cisco / Cisco Networking Academy
Completed two Cisco networking and cybersecurity courses:
- Introduction to Cybersecurity
- Network Defence

Cybersecurity Foundations, Threat Landscape & Awareness
LinkedIn
Completed three cybersecurity courses:
- Cybersecurity Foundations (March 2025)
- The Cybersecurity Threat Landscape (February 2025)
- Cybersecurity Awareness: Cybersecurity Terminology (March 2025)

Focus areas: Cybersecurity fundamentals, threat awareness, vulnerability management, and information security terminology.

SKILLS

Cybersecurity

Database and SQL Security
Vulnerability, Security Assessment and Reporting
Access Control, Authorization & RBAC
Network Security

Technical Skills

Docker
Bash Scripting
User and Account Management
Hardware, Software & Network Troubleshooting
Linux System & Windows Server Administration
Database Management
IT Technical Support

PROJECTS

2026

AFOS, All Facilities One System (final year project, solo)

Flutter, Dart, PostgreSQL, edge functions, Vercel

- Cross-platform university services platform for Android and web with 30 feature modules, including real-time chat, bus tracking, exam seat plans and a digital student ID.
- About 66,000 lines of Dart across roughly 246 files, 80 PostgreSQL tables and around 250 row-level security policies.
- Delegated role-based access control, server-side edge functions for secret-bearing operations, and a tamper-resistant rotating QR digital identity (VR ID).
- Designed and built the backend, database, security model, features, testing and deployment alone. Defended on 15/09/2026.

github.com/rakibhassanrh66/AFOS

2023, rebuilt 2026

Airport Entrance Management System

2023: Java, JavaFX, MySQL. 2026: FastAPI, PostgreSQL 16, SQLAlchemy 2, Docker

- First built in 2023 as a desktop system with role based access control, authentication, passenger logs and daily reports.
- Rebuilt as a backend API with 58 endpoints and a 29-table data model covering flights, tickets and seats, gates, baggage, immigration and crew scheduling.
- Concurrency-safe rules enforced inside PostgreSQL, such as one seat per passenger under simultaneous booking and GiST exclusion constraints against gate and crew double-booking.
- 152 automated tests run against real PostgreSQL in GitHub Actions. Deployed on Vercel and on Render (Docker).

github.com/rakibhassanrh66/Airport-Entrance-Management-System

Bangladesh Automatic License Plate Recognition (ALPR)

Python, OpenCV, YOLOv8, DeepLabV3-ResNet50

- Dataset preparation, exploratory analysis, preprocessing, plate detection and segmentation for Bangladeshi vehicle number plates.

github.com/rakibhassanrh66/Vehicle-Detector-AI

09/2025 - 12/2025

AccessX, controlled security lab

Linux, scripting, client-server communication

- Isolated lab for studying client-server communication, request handling and network reconnaissance, with logging and process control. Run only in authorised test environments.

09/2025 - 12/2025

Deforestation analysis with satellite imagery

Python, Google Earth Engine API, Landsat

- Analysed 25 years of Landsat imagery to track forest change, with outputs designed for environmental dashboards and reports.

Other software projects

- MarkItDown Flutter: free port of Microsoft's file-to-Markdown converter for Windows and Android.
- Goods Store BD: localised Bangladeshi e-commerce platform with web and Flutter apps.
- MedShop: customer storefront and admin panel built with React, Vite and Supabase.
- EZY_House: Flutter and Firebase mobile app.

HONOURS AND AWARDS

2025

2nd Place, SPARK Startup Competition

Team Farmex

Worked on product ideation, team operations and the final pitch to the judging panel.

2017

Regional Achiever (Sylhet), i-Gen Internet Junior

Grameenphone

National IT and internet literacy competition.

VOLUNTEERING AND LEADERSHIP

07/2023 - 12/2025 **Executive Committee Member, ICT Olympiad Bangladesh**
Helped plan and run ICT Olympiad activities and student tech events, handled technical setup, and helped students with programming and IT questions.

2023 and 2024 **Team Leader, Volunteer Operations, Dhaka Marathon**
Coordinated volunteer teams at two annual Dhaka Marathons.

Since 23/01/2023 **Community contributor, Parrot Security OS (Asia region)**
Technical support, user guidance and system testing for the regional community, under the handle “Log66:deadbrat”.

07/2019 - 07/2020 **College Prefect and club roles**
Bangladesh Air Force Shaheen College, Kurmitola, Dhaka

- College Prefect (Red House), 2-star rank: campus discipline, peer mentoring and support during college events.
- President, English Debate Club: organised inter-college tournaments and trained members in public speaking.
- Secretary, Photography Club: organised campus exhibitions and media coverage of college events.

HOBBIES AND INTERESTS

- Cycled through all 64 districts of Bangladesh.
- Solo travel and keeping travel diaries.
- Photography.
