PROFESSIONAL SUMMARY

I shape myself as Cybersecurity professional with a better programming foundation, field technical skills, and practical experience in securing digital systems, networks, and applications with Databases. I am desperate to continue learning, applying research, and eager to work in modern security IT environments based on engineering concepts.

PROJECTS

- **AI Vehicle Detection System** | Python, YOLOv8, OpenCV
  Built a real-time vehicle detection pipeline for live video streams with object classification for traffic analysis.
- **Deforestation Analysis** (Bangladesh) | Python, Google Earth Engine, Landsat
  Performed 25-year NDVI analysis on satellite data to identify deforestation trends and hotspots.
- **Airport Entrance Management System** | Java, JavaFX, MySQL
  Developed a desktop system with role-based access, passenger logs, and reporting using a MySQL backend.
- **AccessX** (Cyber Recon & Phishing Simulation Framework) | (Frontend, Self Hosted)
  Designed a controlled red-team toolkit for reconnaissance and phishing simulations with mobile integration and secure tunneling.

SKILLS

- Security & Systems: Linux administration, Access control, Incident response fundamentals, Basic penetration testing
- Programming: Python, Java, C/C++/C#, Kotlin, Ruby
- Tools & Platforms: Git/GitHub, VS Code, Android Studio, MySQL, MongoDB
- Operating Systems: Windows, Linux (Debian-based Server)
- Web & APIs: Django, RESTful APIs, Basic MERN stack

EDUCATION

B.Sc. in Computer Science & Engineering (Major in Cyber Security)
Daffodil International University
Expected Graduation: September 2026

Higher Secondary Certificate (Science)
Bangladesh Air Force Shaheen College, Kurmitola — GPA: 5.00/5.00

Secondary School Certificate (Science)
Bangladesh Tea Research Institute High School, Sreemangal — GPA: 5.00/5.00
